SOP – Testing in IQE – Pharmacy

Document Number: MVOPT-0054

Version: 3.0

Effective Date: 23-October-2018

Page 2 of 24

1. Purpose

The purpose of this document is to describe the tests required to be performed in the IQE environment, in order to access the Production environment.

Access to PTMVS will be granted by PTMVO to each individual person using a unique system account. PTMVO is categorized as a GxP system and is connected to the EU Hub, a subsystem of the European Medicines Verification System (EMVS). End User IT systems will be connected to PTMVS via an interface or a web portal.

2. Access to test environment

Only after having completed the onboarding process the End User will be eligible for receiving the access credentials to IQE environment of PTMVS. The access credentials will consist of username, initial password and a certificate. These credentials will be supplied to the End User via email. The provided credentials will have administrator privileges. Each End User will create and manage its own users. The instructions to operate user management are described in the document MVOPT-0062_User Management.

The tests will occur on PTMVS's Integrated Quality Environment (IQE), which is connected to EU Hub IQE environment.

The data to be used will be supplied by PTMVO to each End User. That will allow the determination of which set of data to be used in each test scenario, and thus better grasp the behaviour of the systems. The data to be used may or may not be real pack data. If no real pack data is to be used, the data to be used will fulfil the requirements defined for Portuguese market, as per the published legislation and GS1 guidelines.

3. Access to Production Environment (PRD)

Access to the Production Environment will be granted to all End Users that successfully accomplish the tests described in this document. In order to be eligible for access to the Production Environment (PRD), the End User must provide the following documents:

- Report summarizing the results of the test including a table of all test cases, screenshots, list of all defects, description of open defects/issues and final test conclusion. The screenshots of the output of the tested IT system as defined in respective test cases to be added to the Pilot report. For this, the template MVOPT-0068_IQE Test Pilot Report – Pharmacies is to be used by the End User.
- Defect reports concerning all defects detected during testing. For this, the template MVOPT-0035_Defect Report Template is to be used by the End User.

4. System description

PTMVS will serve as the verification platform to which Hospital connects in order to verify the authenticity of medicinal products. Each Hospital has chosen an IT service provider that will deliver the Hospital system and the interface between the Hospital system and PTMVS. For the purpose of this document, the IT service provider can be an internal entity (i.e. the internal IT Department) or an external supplier.

In case of unavailability of the connection between the End User IT system and the PTMVS via the webservices, it will be possible the use of a web-based portal, a graphical user interface (GUI), for the purposes of verifying the authenticity of the unique identifier and decommissioning. In the test scenarios described on section 6 of this document including the expression "manual entry" the GUI will be used.

SOP – Testing in IQE – Pharmacy

Document Number: MVOPT-0054

Version: 3.0

Effective Date: 23-October-2018

Page 3 of 24

5. Definitions

| Term/Acronym | Definition |
|-----------------------|---|
| Authorisation Holders | The group composed by Marketing Authorisation Holders and Parallel Importer Holders. |
| EMVS | European Medicines Verification System. The European system for medicines verification consisting of the European Hub, the NMVS, the interface between those two, and the interfaces to the manufacturer / parallel distributor systems, to the Pharmacy systems and to the pharmacy systems. |
| EU Hub | The subsystem of the European Medicines Verification System that serves as a gateway for the transmission of manufacturer and parallel importer data to the national systems. Furthermore; data reconciliation on repackaging activities is performed on the EU Hub. |
| GxP System | A system that is subject to GxP regulations (x can mean: Clinical, Laboratory, Manufacturing, Pharmaceutical, etc...). The company must ensure that such systems comply with appropriate regulations. |
| End User | End User shall mean any wholesaler, pharmacy, hospital or other person authorized or entitled to supply medicinal products to the public as foreseen under the EU Directive on Falsified Medicines and the Delegated Regulation. |
| IQE | Integrated Quality Environment. |
| ITE | Integrated Test Environment. |
| IT Service Provider | The service provider that delivers the interface between the End User system and PTMVS. Is contracted by the End User. |
| MAH | Marketing Authorisation Holder. |
| NCA | National Competent Authority (In Portugal, INFARMED I.P.). |
| PIAH | Parallel Importer Authorisation Holder. |
| PRD | Production Environment. |
| PTMVO | Portuguese Medicines Verification Organisation. |
| PTMVS | Portuguese Medicines Verification System. A system in the European Medicines Verification landscape that serves as the verification platform for Portugal. The End Users registered (Pharmacies, Pharmacies, Hospitals or Other kind of End Users in the Portuguese context) check the authenticity of a product using a connection to this system. |
| SOP | Standard Operational Procedure. |

6. Test cases for Pharmacy

6.1 Attributes to be tested

The following attributes will be tested:

| Process ID | Description |
|-------------------------------------|-----------------------------------|
| Download product master data | |
| G101 | Download product master data |
| Single pack transactions | |
| G110 | Verify single pack |
| G120 | Dispense single pack |
| G121 | Undo dispense single pack |
| G122 | Dispense single pack manual entry |
| G130 | Destroy single pack |
| G150 | Sample single pack |
| G151 | Undo sample single pack |
| Homogenous bulk transactions | |
| G115 | Bulk verify packs |
| G125 | Bulk dispense packs |
| G127 | Bulk undo dispense packs |
| G135 | Bulk destroy packs |
| G155 | Bulk sample packs |
| G157 | Bulk undo sample packs |
| G188 | Request bulk transaction result |
| G195 | Submit mixed bulk transaction |
| G196 | Request mixed bulk transaction |

6.2 Test cases – Single pack transactions

6.2.1 PTMVS-P-01 Verify, dispense and undo dispense single pack

| | |
|--------------------------------|--|
| Description | Test case to verify that transactions 'Verify single pack', 'Dispense single pack' and 'Undo dispense single pack' can be successfully performed via the Pharmacy IT system interface. |
| Transactions | G110 Verify single pack G120 Dispense single pack G121 Undo dispense single pack |
| Precondition | The Pharmacy has been created in PTMVS and PTMVS has prior knowledge of the entitlement for the Pharmacy to do this transaction. A sufficient number of products/packs have been uploaded in PTMVS. |
| Acceptance criteria | All steps could be successfully completed. |
| Successfully completed | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. |
| Defect report reference | |
| Performed by | |

| Step | Description | Expected result | Actual result |
|------|--|---|---------------|
| 1 | Perform the operation 'Verify single pack' for the predefined packs. Take a screenshot showing the result. | The status of the pack is ACTIVE and the operation is successfully completed. | |
| 2 | Perform the operation 'Dispense single pack' for the packs verified in Step 1. Take a screenshot showing the result. | The operation is successfully completed. | |
| 3 | Perform the operation 'Verify single pack' for the packs dispensed in Step 2. Take a screenshot showing the result. | The status of the pack is INACTIVE (DISPENSED) and the operation is successfully completed. | |
| 4 | Perform the operation 'Undo dispense single pack' for the packs verified in Step 3. Take a screenshot showing the result. | The operation is successfully completed. | |
| 5 | Perform the operation 'Verify single pack' for the packs used in Step 4. Take a screenshot showing the result. | The status of the pack is ACTIVE and the operation is successfully completed. | |

6.2.2 PTMVS-P-02 Dispense single pack manual entry

| | | | |
|--------------------------------|--|-----|-----------------------------|
| Description | Test case to verify that transaction 'Dispense single pack manual entry' can be successfully performed by manually introducing the data into the system. | | |
| Transactions | G110 Verify single pack G122 Dispense single pack manual entry | | |
| Precondition | The Pharmacy has been created in PTMVS and PTMVS has prior knowledge of the entitlement for the Pharmacy to do this transaction. A sufficient number of products/packs have been uploaded in PTMVS. | | |
| Acceptance criteria | All steps could be successfully completed. | | |
| Successfully completed | <input type="checkbox"/> | Yes | <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. | | |
| Defect report reference | | | |
| Performed by | | | |

| Step | Description | Expected result | Actual result |
|------|--|---|---------------|
| 1 | Perform the operation 'Verify single pack' for the predefined packs. Take a screenshot showing the result. | The status of the pack is ACTIVE and the operation is successfully completed. | |
| 2 | Perform the operation 'Dispense single pack manual entry' for the pack verified in Step1. Take a screenshot showing the result. | The operation is successfully completed. | |
| 3 | Perform the operation 'Verify single pack' for the pack dispensed in Step 2. Take a screenshot showing the result. | The status of the pack is INACTIVE (DISPENSED) and the operation is successfully completed. | |

6.2.3 PTMVS-P-03 Sample single pack and undo sample single pack

| | | | |
|--------------------------------|--|-----|-----------------------------|
| Description | Test case to verify that transactions 'Sample single pack' and 'Undo sample single pack' can be successfully performed via the Pharmacy IT system interface. | | |
| Transactions | G110 Verify single pack G150 Sample single pack G151 Undo sample single pack | | |
| Precondition | The Pharmacy has been created in PTMVS and PTMVS has prior knowledge of the entitlement for the Pharmacy to do this transaction. A sufficient number of products/packs have been uploaded to PTMVS. | | |
| Acceptance criteria | All steps could be successfully completed. | | |
| Successfully completed | <input type="checkbox"/> | Yes | <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. | | |
| Defect report reference | | | |
| Performed by | | | |

| Step | Description | Expected result | Actual result |
|------|---|--|---------------|
| 1 | Perform the operation 'Verify single pack' for the predefined packs. Take a screenshot showing the result. | The status of the pack is ACTIVE and the operation is successfully completed. | |
| 2 | Perform the operation 'Sample single pack' for the pack verified in Step 1. Take a screenshot showing the result. | The operation is successfully completed. | |
| 3 | Perform the operation 'Verify single pack' for the pack sampled in Step 2. Take a screenshot showing the result. | The status of the pack is INACTIVE (SAMPLE) and the operation is successfully completed. | |
| 4 | Perform the operation 'Undo sample single pack' for the pack verified in Step 3. Take a screenshot showing the result. | The operation is successfully completed. | |
| 5 | Perform the operation 'Verify single pack' for the pack used in Step 4. Take a screenshot showing the result. | The status of the pack is ACTIVE and the operation is successfully completed. | |

6.2.4 PTMVS-P-04 Destroy single pack

| | | | |
|--------------------------------|--|-----|-----------------------------|
| Description | Test case to verify that transaction 'Destroy single pack' can be successfully performed via the Pharmacy IT system interface. | | |
| Transactions | G110 Verify single pack G130 Destroy single pack | | |
| Precondition | The Pharmacy has been created in PTMVS and PTMVS has prior knowledge of the entitlement for the Pharmacy to do this transaction. A sufficient number of products/packs have been uploaded in PTMVS. | | |
| Acceptance criteria | All steps could be successfully completed. | | |
| Successfully completed | <input type="checkbox"/> | Yes | <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. | | |
| Defect report reference | | | |
| Performed by | | | |

| Step | Description | Expected result | Actual result |
|------|---|---|---------------|
| 1 | Perform the operation 'Verify single pack' for the predefined packs. Take a screenshot showing the result. | The status of the pack is ACTIVE and the operation is successfully completed. | |
| 2 | Perform the operation Destroy single pack' for the pack verified in Step1. Take a screenshot showing the result. | The operation is successfully completed. | |
| 3 | Perform the operation 'Verify single pack' for the pack destroyed in Step 1. Take a screenshot showing the result. | The status of the pack is INACTIVE (DESTROYED) and the operation is successfully completed. | |

6.2.5 PTMVS-P-05 Alarm generation

| | |
|--------------------------------|---|
| Description | Test case to verify that a predefined pack not previously uploaded to the system generates an alarm. |
| Transactions | G110 Verify single pack |
| Precondition | The Pharmacy has been created in PTMVS and PTMVS has prior knowledge of the entitlement for the Pharmacy to do this transaction. The used packs were not previously uploaded to PTMVS. |
| Acceptance criteria | All steps could be successfully completed. |
| Successfully completed | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. |
| Defect report reference | |
| Performed by | |

| Step | Description | Expected result | Actual result |
|------|--|---|---------------|
| 1 | Perform the operation 'Verify single pack' for a predefined pack. Take a screenshot showing the result. | The pack does not exist in the system and an alarm should be generated. | |

6.3 Test cases – Bulk transactions

6.3.1 PTMVS-P-06 Bulk verify packs, bulk dispense packs, undo bulk dispense packs and request bulk transaction result

| | | | |
|--------------------------------|--|-----|-----------------------------|
| Description | Test case to verify that transactions 'Bulk verify packs', 'Bulk dispense packs', 'Bulk undo dispense packs' and 'Request bulk transaction result' can be successfully performed via the Pharmacy IT system interface. | | |
| Transactions | G115 Bulk verify packs G125 Bulk dispense packs G127 Undo bulk dispense packs G188 Request bulk transaction result | | |
| Precondition | The Pharmacy has been created in PTMVS. A sufficient number of products/packs has been uploaded in PTMVS. | | |
| Acceptance criteria | All steps could be successfully completed. | | |
| Successfully completed | <input type="checkbox"/> | Yes | <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. | | |
| Defect report reference | | | |
| Performed by | | | |

| Step | Description | Expected result | Actual result |
|------|---|--|---------------|
| 1 | Perform the operation 'Bulk verify packs' for the predefined packs. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 2 | Perform the operation 'Request bulk transaction result' by using the transaction ID received in Step 1. Take a screenshot showing the result. | The status of all the packs is ACTIVE and the operation is successfully completed. | |
| 3 | Perform the operation 'Bulk dispense packs' for packs verified in Step 2. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 4 | Perform the operation 'Request bulk transaction result' by using the transaction ID received in Step 3. Take a screenshot showing the result. | The status of all the packs is INACTIVE (DISPENSED) and the operation is successfully completed. | |
| 5 | Perform the operation 'Undo bulk dispense packs' for packs dispensed in Step 4. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |

SOP – Testing in IQE – Pharmacy

Document Number: MVOPT-0054

Version: 3.0

Effective Date: 23-October-2018

Page 12 of 24

| | | | |
|---|---|--|--|
| 6 | Perform the operation 'Request bulk transaction result' by using the transaction ID received in Step 5. Take a screenshot showing the result. | The status of all the packs is ACTIVE and the operation is successfully completed. | |
|---|---|--|--|

6.3.2 PTMVS-P-07 Bulk sample packs and undo bulk sample packs

| | |
|--------------------------------|--|
| Description | Test case to verify that transactions 'Bulk sample packs' and 'Undo bulk sample packs' can be successfully performed via the Pharmacy IT system interface. |
| Transactions | G115 Bulk verify packs G155 Bulk sample packs G157 Bulk undo sample packs |
| Precondition | The Pharmacy has been created in PTMVS. A sufficient number of products/packs has been uploaded in PTMVS. |
| Acceptance criteria | All steps could be successfully completed. |
| Successfully completed | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. |
| Defect report reference | |
| Performed by | |

| Step | Description | Expected result | Actual result |
|------|---|--|---------------|
| 1 | Perform the operation 'Bulk verify packs' for the predefined packs. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 2 | Perform the operation 'Request bulk transaction result' by using the transaction ID received in Step 1. Take a screenshot showing the result. | The status of all the packs is ACTIVE and the operation is successfully completed. | |
| 3 | Perform the operation 'Bulk sample packs' for the verified packs in Step 1. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 4 | Perform the operation 'Request bulk transaction result' by using the transaction ID received in Step 3. Take a screenshot showing the result. | The status of all the packs is INACTIVE (SAMPLE) and the operation is successfully completed. | |
| 5 | Perform the operation 'Undo bulk sample packs' for packs used in Step 3. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 6 | Perform the operation 'Request bulk transaction result' by using the transaction ID received in Step 5. Take a screenshot showing the result. | The status of all the packs is ACTIVE and the operation is successfully completed. | |

6.3.3 PTMVS-P-08 Bulk destroy packs

| | | | |
|--------------------------------|---|-----|-----------------------------|
| Description | Test case to verify that transaction 'Bulk destroy packs' can be successfully performed via the Pharmacy IT system interface. | | |
| Transactions | G115 Bulk verify packs. G135 Bulk destroy packs. | | |
| Precondition | The Pharmacy has been created in PTMVS. A sufficient number of products/packs have been uploaded in PTMVS. | | |
| Acceptance criteria | All steps could be successfully completed. | | |
| Successfully completed | <input type="checkbox"/> | Yes | <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. | | |
| Defect report reference | | | |
| Performed by | | | |

| Step | Description | Expected result | Actual result |
|------|---|--|---------------|
| 1 | Perform the operation 'Bulk verify packs' for the predefined packs. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 2 | Perform the operation 'Request bulk transaction result' by using the transaction ID received in Step 1. Take a screenshot showing the result. | The status of all the packs is ACTIVE and the operation is successfully completed. | |
| 3 | Perform the operation 'Bulk destroy packs' for the Step 1 verified packs. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 4 | Perform the operation 'Request bulk transaction result' by using the transaction ID received in Step 3. Take a screenshot showing the result. | The status of all the packs is INACTIVE (DESTROYED) and the operation is successfully completed. | |

6.4 Test cases – Mixed Bulk transactions

6.4.1 PTMVS-P-09 Submit mixed bulk transaction and request mixed bulk transaction result

| | | | |
|--------------------------------|---|-----|-----------------------------|
| Description | Test case to verify that transactions 'Submit mixed bulk transaction' and 'Request mixed bulk transaction result' can be successfully performed via the Pharmacy IT system interface. | | |
| Transactions | G195 Submit mixed bulk transaction G196 Request mixed bulk transaction result | | |
| Precondition | The Pharmacy has been created in PTMVS and PTMVS has prior knowledge of the entitlement for the Pharmacy to do this transaction. A sufficient number of products/packs has been uploaded in PTMVS. | | |
| Acceptance criteria | All steps could be successfully completed. | | |
| Successfully completed | <input type="checkbox"/> | Yes | <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. | | |
| Defect report reference | | | |
| Performed by | | | |

| Step | Description | Expected result | Actual result |
|------|--|--|---------------|
| 1 | Disconnect the Pharmacy IT system from PTMVS. Perform the operation 'Dispense single pack' for a predefined pack. Take a screenshot showing the result. | The transaction is cached on the Pharmacy IT system. | |
| 2 | Perform the operation 'Undo dispense single pack' for the pack dispensed in Step 1. Take a screenshot showing the result. | The transaction is cached on the Pharmacy IT system. | |
| 3 | Perform the operation 'Destroy single pack' for the pack used in Step 2. Take a screenshot showing the result. | The transaction is cached on the Pharmacy IT system. | |
| 4 | Reconnect the Pharmacy IT system to PTMVS. Perform the operation 'Submit mixed bulk transaction'. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 5 | Perform the operation 'Request mixed bulk transaction result' by using the transaction ID received in Step 4. Take a screenshot showing the | All transactions are correctly listed on the report. | |

SOP – Testing in IQE – Pharmacy

Document Number: MVOPT-0054

Version: 3.0

Effective Date: 23-October-2018

Page 16 of 24

| | | | |
|---|---|---|--|
| | result. | | |
| 6 | Perform the operation 'Verify single pack' for the pack used in Steps 1-3. Take a screenshot showing the result. | The status of the pack is INACTIVE (DESTROYED) and the operation is successfully completed. | |

6.5 Test cases – Undo single pack transactions (10 days after the initial transaction)

6.5.1 PTMVS-P-10 Undo dispense single pack (10 days after the initial transaction)

| | |
|--------------------------------|--|
| Description | Test case to verify “Undo dispense single pack” after 10 days of a “dispense single pack” can´t be successfully performed via the Pharmacy IT system interface. This test case must be performed after 10 days of the initial transaction. |
| Transactions | G110 Verify single pack G120 Dispense single pack G121 Undo dispense single pack |
| Precondition | The Pharmacy has been created in PTMVS and PTMVS has prior knowledge of the entitlement for the Pharmacy to do this transaction. A sufficient number of products/packs have been uploaded in PTMVS. |
| Acceptance criteria | All steps could be successfully completed. |
| Successfully completed | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. |
| Defect report reference | |
| Performed by | |

| Step | Description | Expected result | Actual result |
|------|---|--|---------------|
| 1 | Perform the operation ‘Verify single pack’ for the predefined packs. Take a screenshot showing the result. | The status of the pack is ACTIVE and the operation is successfully completed. | |
| 2 | Perform the operation ‘Dispense single pack’ for the packs verified in Step 1. Take a screenshot showing the result. | The operation is successfully completed. | |
| 3 | Perform the operation ‘Verify single pack’ for the packs dispensed in Step 2. Take a screenshot showing the result. | The status of the pack is INACTIVE (DISPENSED) and the operation is successfully completed. | |
| 4 | Wait for 10 days | - | |
| 5 | Perform the operation ‘Undo dispense single pack’ for a predefined pack. Take a screenshot showing the result. | The status of the pack is INACTIVE (DISPENSED) and the Undo operation is not possible to complete. | |

6.5.2 PTMVS-P-11 Undo sample single pack (10 days after the initial transaction)

| | |
|--------------------------------|--|
| Description | Test case to verify that transactions “Undo sample single pack” can´t be successfully performed via the Pharmacy IT system interface. This test case must be performed after 10 days of the initial transaction. |
| Transactions | G150 Sample single pack G151 Undo sample single pack |
| Precondition | The Pharmacy has been created in PTMVS and PTMVS has prior knowledge of the entitlement for the Pharmacy to do this transaction. A sufficient number of products/packs have been uploaded in PTMVS. |
| Acceptance criteria | All steps could be successfully completed. |
| Successfully completed | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. |
| Defect report reference | |
| Performed by | |

| Step | Description | Expected result | Actual result |
|------|--|---|---------------|
| 1 | Perform the operation ‘Sample single pack’ for a predefined pack. Take a screenshot showing the result. | The operation is successfully completed. | |
| 2 | Perform the operation ‘Verify single pack’ for the pack sampled in Step 1. Take a screenshot showing the result. | The status of the pack is INACTIVE (SAMPLE) and the operation is successfully completed. | |
| 3 | Wait for 10 days | - | |
| 4 | Perform the operation ‘Undo sample single pack’ for a pre-defined pack. Take a screenshot showing the result. | The status of the pack is INACTIVE (SAMPLE) and the Undo operation is not possible to complete. | |

6.6 Test cases – Undo bulk pack transactions (10 days after the initial transaction)

6.6.1 PTMVS-P-12 Undo bulk dispense packs (10 days after the initial transaction)

| | |
|--------------------------------|--|
| Description | Test case to verify that transactions, “Undo bulk dispense packs” can’t be successfully performed via the Pharmacy IT system interface. This test case must be performed after 10 days of the initial transaction. |
| Transactions | G115 Bulk verify packs G125 Bulk dispense packs G127 Undo bulk dispense packs G188 Request bulk transaction result |
| Precondition | The Pharmacy has been created in PTMVS. A sufficient number of products/packs has been uploaded in PTMVS. |
| Acceptance criteria | All steps could be successfully completed. |
| Successfully completed | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. |
| Defect report reference | |
| Performed by | |

| Step | Description | Expected result | Actual result |
|------|---|--|---------------|
| 1 | Perform the operation ‘Bulk verify packs’ for the predefined packs. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 2 | Perform the operation ‘Request bulk transaction result’ by using the transaction ID received in Step 1. Take a screenshot showing the result. | The status of all the packs is ACTIVE and the operation is successfully completed. | |
| 3 | Perform the operation ‘Bulk dispense packs’ for packs verified in Step 2. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 4 | Perform the operation ‘Request bulk transaction result’ by using the transaction ID received in Step 3. Take a screenshot showing the result. | The status of all the packs is INACTIVE (DISPENSED) and the operation is successfully completed. | |
| 5 | Wait for 10 days | - | |
| 6 | Perform the operation ‘Undo bulk dispense packs’ for the packs used | The status of all the packs is INACTIVE | |

SOP – Testing in IQE – Pharmacy

6.6.2 PTMVS-P-13 Undo bulk sample packs (10 days after the initial transaction)

| | | |
|--------------------------------|---|-----------------------------|
| Description | Test case to verify that transactions “Undo bulk sample packs” can’t be successfully performed via the Pharmacy IT system interface. This test case must be performed after 10 days of the initial transaction. | |
| Transactions | G115 Bulk verify packs G155 Bulk sample packs G157 Bulk undo sample packs | |
| Precondition | The Pharmacy has been created in PTMVS. A sufficient number of products/packs has been uploaded in PTMVS. | |
| Acceptance criteria | All steps could be successfully completed. | |
| Successfully completed | <input type="checkbox"/> Yes | <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. | |
| Defect report reference | | |
| Performed by | | |

| Step | Description | Expected result | Actual result |
|------|---|--|---------------|
| 1 | Perform the operation ‘Bulk verify packs’ for the predefined packs. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 2 | Perform the operation ‘Request bulk transaction result’ by using the transaction ID received in Step 1. Take a screenshot showing the result. | The status of all the packs is ACTIVE and the operation is successfully completed. | |
| 3 | Perform the operation ‘Bulk sample packs’ for the Step 1 verified packs. Take a screenshot showing the result. | A confirmation of receipt containing a transaction ID is returned and the operation is successfully completed. | |
| 4 | Perform the operation ‘Request bulk transaction result’ by using the transaction ID received in Step 3. Take a screenshot showing the result. | The status of all the packs is INACTIVE (SAMPLE) and the operation is successfully completed. | |
| 5 | Wait for 10 days | - | |
| 6 | Perform the operation ‘Undo bulk sample packs’ for the packs used in Step 1. Take a screenshot showing the result. | The status of all the packs is INACTIVE (SAMPLE) and the Undo operation is not possible to complete. | |

6.7 Test cases – Download product master data

6.7.1 PTMVS-P-14 Download product master data – 1 code

| | |
|--------------------------------|--|
| Description | Test case to verify that the Pharmacy can download product master data stored in PTMVS. |
| Transactions | G101 Download product master data |
| Precondition | The Pharmacy has been created in PTMVS. A sufficient number of products/packs has been uploaded in PTMVS. |
| Acceptance criteria | All steps could be successfully completed. |
| Successfully completed | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. |
| Defect report reference | |
| Performed by | |

| Step | Description | Expected result | Actual result |
|------|---|--|---------------|
| 1 | Request the download of the product master data for a predefined product. Take a screenshot showing the result. | The product master data is successfully downloaded. The data received is: - Product code - National product code - MAH registration number - List of contracted wholesalers (empty if product code not found). | |

6.7.2 PTMVS-P-15 Download product master data – all codes

| | |
|--------------------------------|--|
| Description | Test case to verify that the Pharmacy can download product master data stored in PTMVS. |
| Transactions | G101 Download product master data |
| Precondition | The Pharmacy has been created in PTMVS. A sufficient number of products/packs has been uploaded in PTMVS. |
| Acceptance criteria | All steps could be successfully completed. |
| Successfully completed | <input type="checkbox"/> Yes <input type="checkbox"/> No |
| Packs used | Send file to PTMVO with the packs used. |
| Defect report reference | |
| Performed by | |

| Step | Description | Expected result | Actual result |
|------|--|--|---------------|
| 1 | Request the download of all product master data available in the system. Take a screenshot showing the result. | The product master data is successfully downloaded. The data received is: - Product code - National product code - MAH registration number - List of contracted wholesalers | |
